PROJECTS

Codebase AI — AI Powered Codebase Analyzer Live Link | Repository
Next.js, Tailwind CSS, TypeScript

- Built an AI-powered platform that analyzes GitHub repositories from a repository URL and generates interactive visualizations of project architecture, modules, dependencies, and code structure.
- Implemented authenticated analysis history, enabling users to save, manage, and revisit previously generated codebase reports.
- Designed an intuitive dashboard with repository insights, architecture diagrams, and AI-generated summaries to simplify understanding of complex codebases.

UGC AI — AI Content Generation Platform Live Link | Repository
React, TypeScript, Clerk, Vercel

- Developed a platform that generates professional lifestyle imagery and short-form videos from product and model photos.
- Built authentication using Clerk and deployed scalable frontend on Vercel.
- Designed creator-focused workflow for rapid content generation.

Centora — SaaS Landing Page Live Link | Repository
Next.js, Tailwind CSS, ShadCN, Figma

- Built a high-converting SaaS landing page with modern UI and responsive design.
- Implemented reusable components and scalable structure.

CERTIFICATIONS

- Solved more than 400 DSA problems on LeetCode.
- Earned 4 LeetCode badges for coding consistency and problem-solving.
